Baby food is any soft, easily consumed food other than breastmilk or infant formula that is made specifically for human babies between four to six months and two years old. The food comes in many varieties and flavors that are purchased ready-made from producers. Or it may be table food eaten by the family that has been mashed or otherwise broken down.

Baby food - Wikipedia

Babies in this age-group can sample a lot more variety and can even partake of regular family meals. Babies now have a few teeth and their digestive systems have matured to a major extent. Though it is still important to follow discretion with giving them anything , their bodies and taste-buds are prepared for a lot more than earlier.
