

Autumn Changes Part 4

Autumn Changes Part 4

The Mid-Autumn Festival is a harvest festival celebrated notably by the Chinese, Vietnamese and Korean people. The festival is held on the 15th day of the 8th month of the lunar calendar with full moon at night, corresponding to late September to early October of the Gregorian calendar with a full moon at night.. Mooncakes, a rich pastry typically filled with sweet bean paste or lotus seed paste ...

Mid-Autumn Festival - Wikipedia

Autumn, also known as fall in American English and sometimes in Canadian English, is one of the four temperate seasons. Autumn marks the transition from summer to winter, in September (Northern Hemisphere) or March (Southern Hemisphere), when the duration of daylight becomes noticeably shorter and the temperature cools considerably. One of its main features in temperate climates is the shedding ...

Before we learn why leaves change color in autumn, let's talk about what leaves do during the rest of the year. Each leaf on a tree is like a tiny solar panel, gathering sunlight the tree uses to make food. Sunlight helps turn water and carbon dioxide into oxygen and glucose, a sugar that the tree ...

Seasonal Changes Although most of you know what seasons are, we wanted to give you a quick overview. Seasons are all created because the Earth actually sits on a small tilt. If you put a stick through the planet and watched it spin, you would see that we spin 23.5 degrees off a straight up and down position.

Summer Plants grow fast in summer. People act energetically, and the body's qi and blood become relatively more vigorous than in other seasons. TCM claims that the physiological changes make the heart over-function, and there is too much yang qi flows outward to the exterior part of the body. According to the five elements theory, an over-functioning heart restricts the lung functioning, it ...
