

Colorado Protein Stability Conference 2016

Colorado Protein Stability Conference 2016

Worried about protein aggregation in your pre- or post-formulation drug? Spectradyne's nCS1 TM delivers dramatic savings in time and materials by accurately quantifying aggregation earlier in the particle formation process than other technologies can. Get results in minutes, using only 3 microliters of your sample.

Exosomes Extracellular Vesicles Nanoparticles - Spectradyne

The high resolution of the IMS-TOF enables confident analysis of isomers, protein conformers, and lipids. Atmospheric-pressure, drift-tube ion mobility spectrometry (IMS) with high-speed TOFMS detection. Fast, decisive 2-dimensional separations with IMS resolving power up to 200.

TYLER W. LEBARON EXECUTIVE DIRECTOR "While hydrogen's antioxidant effects have been the primary focus of hundreds of studies since the 2007 Nature Medicine publication, I'm more intrigued by the studies suggesting that hydrogen regulates various signal transduction pathways.

TYLER W. LEBARON | Molecular Hydrogen Institute

Research Interest. Our research focuses on problem alcoholic fermentations and spoilage microorganisms of concern to winemakers. Problem alcoholic fermentations are those where utilization of fermentable sugars by wine yeast is slow and/or undesirable off-odors and flavors are produced.

About this collection. Noncovalent interactions (hydrogen, aerogen, halogen, chalcogen, pnictogen, tetrel and icosagen bonds, as well as cation- π , anion- π , lone pair- π , π - π stacking, agostic, pseudo-agostic, anagostic, dispersion-driven, lipophilic, etc.) concern weak forces of attraction formed between different molecules (intermolecular) or fragments of the same molecule (intramolecular).

1st International Conference on Noncovalent Interactions

Jack Putz, PhD Rising Seas, Retreating Forests, and other Rapid Changes in Coastal Ecosystems.

Rapid ecological changes are underway along the Gulf of Mexico's Big Bend region in Florida, the least developed coastline in the lower 48 states. Especially where coastal ecosystems sit on limestone platforms, aquifer water removals are minor, and tidal fluxes are small, the signal-to-noise ratio ...

A genetically modified organism (GMO) is any organism whose genetic material has been altered using genetic engineering techniques. The exact definition of a genetically modified organism and what constitutes genetic engineering varies, with the most common being an organism altered in a way that "does not occur naturally by mating and/or natural recombination".

Genetically modified organism - Wikipedia
