Dynamics And Thermodynamics In Hierarchically

A hierarchy is typically depicted as a pyramid, where the height of a level represents that level's status and width of a level represents the quantity of items at that level relative to the whole. [citation needed] For example, the few Directors of a company could be at the apex, and the base could be thousands of people who have no subordinates. These pyramids are typically diagrammed with a ...

1. Introduction. As Schrödinger famously observed many years ago, living systems are unique among natural systems because they appear to resist the second law of thermodynamics by persisting as bounded, self-organizing systems over time. How is this remarkable feat possible? What is life? How is it realised in physical systems? And how can we explain and predict its various manifestations and ...

Answering Schrödinger's question: A free-energy formulation

Protein folding is the physical process by which a protein chain acquires its native 3-dimensional structure, a conformation that is usually biologically functional, in an expeditious and reproducible manner. It is the physical process by which a polypeptide folds into its characteristic and functional three-dimensional structure from random coil. Each protein exists as an unfolded polypeptide ...

Each year, ICTP organizes more than 60 international conferences and workshops, along with numerous seminars and colloquiums. These activities keep the Centre at the forefront of global scientific research and enable ICTP staff scientists to offer Centre associates, fellows and conference participants a broad range of research opportunities.

In 1794, Eli Whitney patented the cotton gin. [added 02/01/03] In 1795, James Hutton, a proponent of the vast antiquity of geological formations, wrote Theory of the Earth, the earliest comprehensive treatise which can be considered a geologic synthesis. Confining his attention to the earth's dynamics, he deplored speculative attempts to account for the origin of processes which could be

One of the most important parts of choosing a research programme is finding a supervisor who has relevant expertise in your area of interest. When you find a supervisor who, or a project that, aligns with your research interests, you should make contact with the relevant potential supervisor/lecturer/Professor or NUI Galway staff member to discuss matters further.

The name "France" comes from the Latin Francia, which means "country of the Franks". There are various theories as to the origin of the name Franks: one is that it is derived from the Proto-Germanic word frankon which translates as javelin or lance as the throwing axe of the Franks was known as a francisca. Another proposed etymology is that in an ancient Germanic language, Frank means free as ...
