PURPOSE • Provide current and accurate technical information as it relates to the design, production and installation of precast concrete utility vaults.

### **PRECAST CONCRETE UNDERGROUND UTILITY VAULTS**

Concrete, usually Portland cement concrete, is a composite material composed of fine and coarse aggregate bonded together with a fluid cement (cement paste) that hardens over time—most frequently a lime-based cement binder, such as Portland cement, but sometimes with other hydraulic cements, such as a calcium aluminate cement. It is distinguished from other, non-cementitious types of concrete ...

DISCUSSION: The concrete material, Concrete06 (Fig. 2), keeps the simplicity of previous formulations (Concrete01 to Concrete03). However, envelope curves have been modified to represent concrete behavior in membrane elements.

A power trowel (also known as a "power float") is a piece of light construction equipment used by construction companies and contractors to apply a smooth finish to concrete slabs.

### **Power trowel - Wikipedia**

Sizes of concrete reinforcing bar. According to the standard (sec. 20.3.5), "it shall be permissible to

substitute a metric size bar of Grade 280 for the corresponding inch-pound size bar of Grade 40, a metric size bar of Grade 420 for the corresponding inch-pound size bar of Grade 60, and a metric size bar of Grade 520 for the corresponding inch-pound size bar of Grade 75.”

A total of sixteen concrete beams were fabricated and tested at the concrete laboratory of Cairo University, Giza, Egypt , .All the specimens were 2000 × 250 × 150 mm with a loaded span 1800 mm. The main reinforcement consisted of two high grade (400/600) steel deformed bars with diameter 10 mm. The specimens were divided into five groups as shown in Table 1.
