

Schalm S Veterinary Hematology

Schalm S Veterinary Hematology

Welcome to eClinPath, an online textbook on Veterinary Clinical Pathology. The goal of this site is to be an educational resource on veterinary clinical pathology - an "on-line" textbook as it were.

eClinPath | A Resource for Veterinary Clinical Pathology

The distinguishing feature of lymphocytes is their dense, round to slightly indented nucleus with smooth (clumped or blocky chromatin, i.e. heterochromatin), a small amount of clear to pale blue cytoplasm with a high nuclear:cytoplasmic ratio (i.e. the majority of the cell is taken up by the nucleus with only a small volume of cytoplasm visible).

A CBC is often completed as part of the minimum database. When the CBC is performed with an in-house hematology analyzer, a blood smear evaluation should be pursued as well to verify automated results, including confirmation of white blood cell (WBC) differential and evaluation for atypical cells, such as mast cells, blasts, and nucleated red blood cells.

Lomustine (); abbreviated as CCNU; original brand name CeeNU, now marketed as Gleostine) is an alkylating nitrosourea compound used in chemotherapy. It is closely related to semustine and is in the same family as streptozotocin. It is a highly lipid-soluble drug, thus it crosses the blood-brain barrier. This property makes it ideal for treating brain tumors, which is its primary use, although it ...

Evaluation of the safety of new chemicals and pharmaceuticals requires the combination of information from various sources (e.g. in vitro, in silico and in vivo) to provide an assessment of risk to human health and the environment. The authors have identified opportunities to maximize the predictivity of this information to humans while reducing animal use in four key areas; (i) accelerating ...
