Vertical Take Off

A vertical take-off and landing (VTOL) aircraft is one that can hover, take off, and land vertically. This classification can include a variety of types of aircraft including fixed-wing aircraft as well as helicopters and other aircraft with powered rotors, such as cyclogyros/cyclocopters and tiltrotors.

Watch this fighter jet's insane vertical takeoff. The takeoff seems entirely normal until the pilot appears to push the "Make Like A Rocket" button. Suddenly, the plane turns to the vertical and rises like a NASA shuttle. Polish pilots are world-renowned for their extraordinary skills, even the ones on the national airline LOT.
